Lack's Cancer Center
200 Jefferson SE
Grand Rapids, Michigan

WORKSHOP OVERVIEW

The Trauma Model Therapy involves a mix of cognitive-behavioral and expressive therapies. It is suitable for a wide range of Axis I and II disorders and addictions, and for the extensive comorbidity common in borderline personality disorder. Treatment techniques will be illustrated through case examples, a role-play and didactic lecture. There will also be time for case consultation and discussion.

WORKSHOP OBJECTIVES

Participants will be given an overview of the Trauma Model of severe psychopathology. Participants will explore the effects of trauma and its relationship to comorbidity. Participants will be provided with the identifying factors related to the core cognitive errors occurring within clients with trauma-related disorders. Participants will be provided with specific treatment techniques through role-playing.

WORKSHOP AGENDA

8:30 – 9:00 Registration/Continental Breakfast

9:00 – 10:30 Trauma Model, Structure of the Model, Comorbidity

10:30 - 10:45 Break
